

SHAIKH SHADAB

Web & Backend Developer

☎ (+91) 9324852474 @ shaikhshadab2604@gmail.com ☆ github.com/Shadab-2604

SUMMARY

A motivated **Web & Backend Developer** with expertise in **Node.js, Python, PHP, C#, JavaScript, and MySQL**. Strong foundation in **full-stack development**, API creation, and database management. Experienced in **hackathons and internships**, excelling in **problem-solving and teamwork** under pressure. Passionate about **building scalable, high-performance applications** and integrating **AI and cloud technologies** to drive innovation.

EXPERIENCE

Alegria Web-weaving Hackathon (Secured 1st Rank)

Alegria

📍 Panvel, India

- Developed "Radio Rewind," a retro music streaming website in 6 hours
- Showcased skills in web development, teamwork, and creative problem-solving

Fastest Coder First | Hackathon

Microsoft

📍 Bangalore

- Led a team of 3 to develop a functional command-line weather tool in Python
- Utilized weather API and demonstrated ability to work under pressure

Ex-Intern at TCR Innovation

Generative AI Intern | Oct 2024 - Dec 2024 (2 months) | (Remote)

📍 Navi Mumbai

- Utilized Pandas for data preprocessing, optimization, and feature engineering to support AI model development.

CodeBug 2K25 | 24-Hour Hackathon 1st Runner-Up

Sahyog College Of IT and Management Studies

📍 Thane

- ✓ Built **WebRoom**, a platform for study material sharing, project collaboration, and video calls
- ✓ Developed a **responsive web app** in 24 hours
- ✓ Showcased **full-stack development, teamwork, and problem-solving**

EDUCATION

Bachelor of Computer Applications.

Kavikulaguru Kalidas Sanskrit University NAAC A+

📍 Pune, India

Grades

School or University

- XII (Maharashtra Board) | Central Public 64% | 2022
- X (Maharashtra Board) | Sumaiya College 73.60% | 2020
- Aggregate Percentage (BCA) : 70.94% | CGPA: 8.68

MY PROJECTS

Content Summarizer

A tool that shortens lengthy content into key points, quick, simple, and efficient!

<https://github.com/Shadab-2604/Summarizer>

Expense Tracker API

An API for tracking expenses, categorizing transactions, and generating financial summaries.

<https://github.com/Shadab-2604/Backend-PR/tree/main/Beginner/expense-tracker-API>

Weather API

A custom weather API integrating with a third-party service and implementing caching for performance.

<https://github.com/Shadab-2604/Backend-PR/tree/main/Beginner/weather-api>

Fullstack Cafe Website

Dynamic PHP and MySQL-based online coffee shop simulation

<https://github.com/Shadab-2604/Sitarabucks-PHP>

Java Banking System with MySQL Integration

A console-based banking system in Java with MySQL database integration for account management and transaction processing.

<https://github.com/Shadab-2604/JAVA-Banking>
